osCommerce SEO Friendly Urls

Created by John Barounis, www.johnbarounis.com

Current version: 2.0.0

The creator of the famous Alternative Administration System for osCommerce, presents you the osCommerce SEO Friendly Urls addon!

SEO Friendly Urls is a new addon for the osCommerce CMS that will change the default urls into what a modern website's urls should be!

Read more: http://www.johnbarounis.com/coding/oscommerce/seo-friendly-urls-addon

From version to version there are some new installation steps or micro corrections so please read again the installation guide so to include the new steps.

The addon is clever coded so it can recognize if you are using a different version or edition and so it will auto install but first you must replace the catalog/includes/classes/seo_friendly_urls.php with the newer php class file (seo_friendly_urls.php).

Then navigate to the home page once so the old version to get removed and then one more time so to be installed again.

Note: Any changes you've done from the configuration panel to the addon will be lost.
A work around on this, is on the way and it will be released in the next version.

If you have any problem updating to a new version just send me a message:
